

Joesoftware works for people.

Joesoftware builds corporate operations software for business people who expect more. Adding one of Joe's e·Team products to your roster is like adding an expert to your staff.

Joe software works for people

Joe's corporate operations software is geared primarily to Microsoft Dynamics GP and of course, the user. Simply, Joe provides:

Products

- the e•Team
- a portfolio of enhancements, add-ons and custom applications

Services

- customization
- implementation
- training
- technical support

Backed by a group of highly-specialized professionals, Joe's e•Team has earned a reputation for excellence in payroll, human resources and web-based financial solutions. His extensive portfolio of add-ons further enhances functionality of the e•Team as well as many other corporate software products, with a rare uncomplicated style.

Joesoftware has been operating from Edmonton, Alberta, Canada as the sibling of the highly-reputable SWCS Consulting since the early 90s. Joe's client base now extends throughout North America and abroad. Clients range from international corporations and provincial governments to local small businesses.

well-defined product scope – Joe offers a distinct line of products (the e•Team), as well as enhancements, add-ons and custom applications (Joe's portfolio) and related services for projects of any magnitude.

Joe's e•Team

customizable products that let you extend the power of your Microsoft Dynamics GP software with ease.

Penny

a revolutionary self-service system that allows employees and managers quick, easy access to their payroll/HR information such as on-line advice slips and time bank entitlements, from any browser-enabled computer.

Penny's Briefcase – products from Joe's portfolio that help Penny do a better job:

- e•Stat Holiday Calculator
- Timesheet Templates

Spencer

a quick and easy way to ensure corporate expenses are accurately entered, approved and integrated with purchasing or payroll.

Spencer's Briefcase – products from Joe's portfolio that help Spencer do a better job:

- Payroll Payables Manager
- Active Directory Manager

Clear mission

Joe is on a mission to consistently exceed client expectations... to provide integrated tools that help offices run efficiently and help people get important information quickly.

He does it by building great products and strong relationships with partners and their clients, by keeping the process simple and flexible and by investing in the best talent in the field.

An impressive collection of enhancements, add-ons and custom applications that increase the functionality of Joe's e-Team, as well as a variety of other corporate software products.

Products

Active Directory Manager

ADM enables directory integration for Penny and Spencer, reducing the number of passwords end-users need to remember.

Requirements: Penny or Spencer

Advanced Paycode Distribution

The hybrid you need to further allocate payroll income, benefits and deductions paycodes. APD allows you to distribute common paycodes based on a fixed percentage and exception paycodes based on income splits in the current batch.

Requirements: Microsoft Dynamics GP Canadian Payroll

Bank Reconciliation Manager

Improve Microsoft Dynamics GP Bank Reconciliation module or Encore's Bank Reconciliation module by seamlessly integrating Cheques in detail and Direct Deposits in summary.

Requirements: Microsoft Dynamics GP Canadian Payroll with Bank Reconciliation or Encore Multi-Currency Bank Reconciliation

Direct Deposit Manager

This is a "Must Have" tool for companies running multiple Payroll batches for the same pay cycle. DDM combines multiple Direct Deposit batches together and even allows them to be recreated if lost.

Requirements: Microsoft Dynamics GP Canadian Payroll

Multi-Batch Manager

Improve your payroll process by allowing multiple batches to be calculated simultaneously. Whether you need multiple people to calculate at the same time or to work on several calculated batches concurrently, this product is for you.

Requirements: Microsoft Dynamics GP Canadian Payroll

Quick Cheque

Designed as your dashboard to faster payroll processing, simply start Quick Cheque, pick the payroll steps you want completed and hit "GO". Quick Cheque handles the rest.

Requirements: Microsoft Dynamics GP Canadian Payroll

WebROE Manager

Quickly process and validate XML-compliant ROE's using Service Canada's automated interface. Our Mass Selection and validation tool facilitates processing a single ROE or several hundred of them in one easy step. Works great for seasonal employees!

Requirements: Microsoft Dynamics GP Canadian Payroll

Customizations

Advanced Rate Table Manager

Rate tables have never been easier! Automatically compensate for mid-cycle pay adjustments and create a history of changes. Gain the ability to generate batches based on rate tables.

Requirements: Microsoft Dynamics GP Canadian Payroll

e-Stat Holiday Calculator

Easily automate the calculation of statutory entitlements. This product can be configured for multiple provinces with varying pay rules.

Requirements: Penny, Microsoft Dynamics GP Canadian Payroll

Employee Audit Trail Manager

Never ask, "What happened?" again! With Employee Audit Trail Manager, you can instantly track down who, when and what was changed on an employee card.

Requirements: Microsoft Dynamics GP Canadian Payroll

Fringe Benefits Allocator

Allows actual benefits to be automatically posted back into Project Accounting. Project Accounting does a great job of capturing time expenses but uses an estimated surcharge for many of the other costs associated with time. If your projects require actual costs instead of estimated amounts, Fringe Benefits Allocator is the tool for you.

Requirements: Microsoft Great Plains Canadian Payroll and Project Accounting

Job Distribution

Extend the functionality of Canadian Payroll by enabling distribution masking on Canadian Payroll Jobs or Phases. Actual costs are easily redistributed to any type of Job and additional costs, such as Vacation accrual, can be added to the totals. If Billing and Project Budgeting are not required but allocation of time costs is, Job Distribution can solve your needs without a Project Accounting or Job Costing module.

Requirements: Microsoft Great Plains Canadian Payroll

Payroll Payables Manager

Automatically clear an outstanding employee expense claim and create a payroll paycode so only one payroll cheque is cut.

Requirements: Microsoft Dynamics GP Payables Management, Canadian Payroll

Payroll Receivables Manager

Streamline cost recovery for employee gift shop or cafeteria charges by creating a payroll deduction. A link between Receivables Management and Payroll simplifies these transactions.

Requirements: Microsoft Dynamics GP Receivables Management, Canadian Payroll

Pension Adjustment Manager

Calculate pension adjustments automatically from within Canadian Payroll.

Requirements: Microsoft Dynamics GP Canadian Payroll

Timesheet Templates

Streamline data entry and ensure your labour costs are allocated to the right projects with minimal key strokes.

Requirements: Penny

Vacation Auditor

By taking a snapshot of vacation entitlements and producing an audit report, this tool allows your payroll staff to always validate vacation liability and provide certainty that balances have not been changed in the Employee's card.

Requirements: Microsoft Dynamics GP Canadian Payroll

Joe's services

a full slate of services to enhance any of Joe's products, extend his portfolio offerings or create a new application when the need arises

Customization

Joe will customize any product to accommodate specific client needs. From adding a custom field to integrating with legacy systems, Joe's team tailors the product until it fits like a glove.

Implementation

Joe is the expert at e•Team implementations. Our intimate knowledge of our products allows us to install, configure and deploy our products in a minimum amount of time with maximum results.

Training

Joe offers training on our e•Team and portfolio products as well as Microsoft Dynamics GP payroll and HR products.

Technical support

Joe thoroughly trains his partners to provide first line support to customers. Joe has the expertise to provide supplemental support for complex, customized and unique situations.

Microsoft Business Solutions
ISV/Software Solutions

Joe's experts

Joe's team uses their wealth of training, practical experience and creative problem solving to build the highest quality software in the industry. Joe distributes this software through a number of independent partners: experts who specialize in Joe's products. This allows Joe to focus on mastering the emerging technologies that keep his software and his clients on the leading edge.

Staying focused on building great software, while relying on partners for distribution is the best way to maintain Joe's competitive advantage in an industry that grows and changes every day.
