

Spencer

your expense expert

Spencer is Joe's e•solution...

for the millions of tiny pieces of paper that go astray between incurring expenses and the monthly hassle of claiming them. With Spencer, everyone in the company gets immediate, secure access to their records, even from remote locations. Spencer's friendly interface makes entering your info a snap.

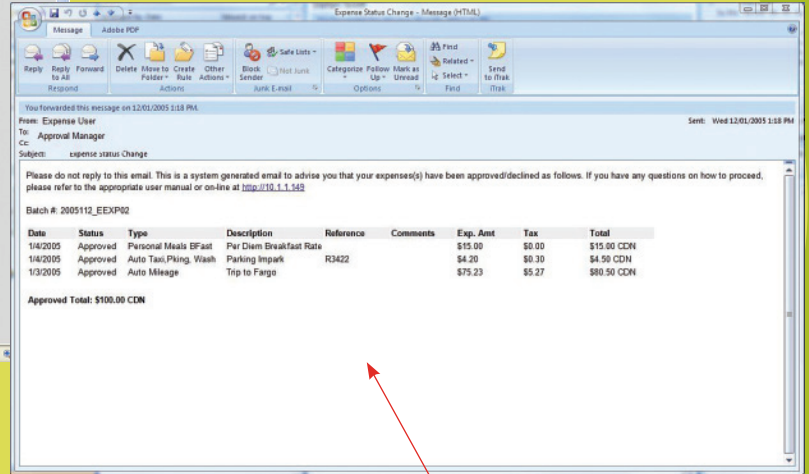

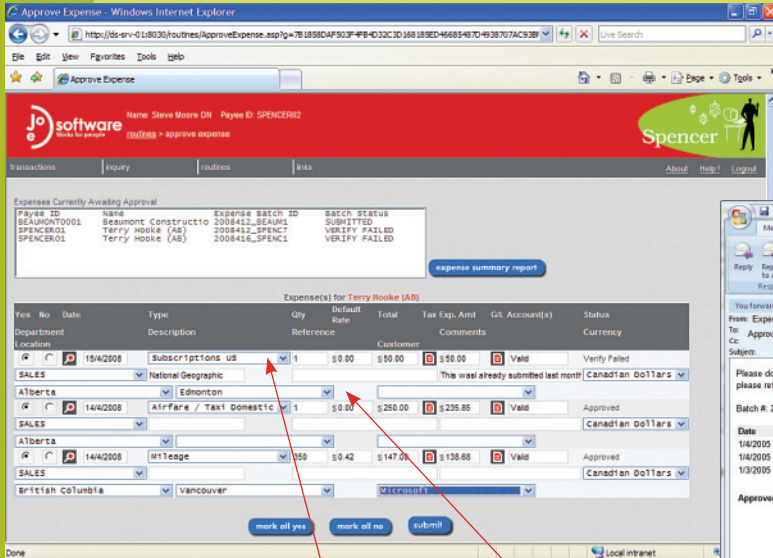

Product Profile

- simple – convenient, browser-based interface.
- cost effective – no monthly fees.
- adaptable – customize screens and reports to fit your corporate mindset, or add additional features from Spencer's briefcase.
- integrated – use with Purchasing Management, Multi Currency Management (optional) and Project Accounting (optional) for Microsoft Dynamics GP.
- highly secure – control your information by hosting in your environment.
- flexible – manage and approve expense claims using your existing business processes.
- reliable – a solid foundation means Spencer is always there when you need him.

Return on Investment

- budget friendly – own Spencer for a fraction of what you'll save by working with him.
- allows quick, flexible access – employees can access Spencer from anywhere in the world.
- trouble free – no client software. Spencer works with current web browsers.
- easy-to-use – little or no training required.
- superior security – you control who can see information and when they can see it.
- do it once – information is entered and automatically flows through to your accounting system.
- do it right – corporate controls can be enforced ensuring only valid expenses are paid out.

The friendly face of Spencer

Define unlimited expense types

- Microsoft Dynamics GP
- Microsoft SQL Server or MSDE
- Purchasing Management, Multi Currency Management (optional) or Project Accounting (optional)
- Microsoft Windows 2000 Server or higher with IIS on SMTP server

What our customers are saying:

"We looked at the alternatives and quickly decided to add Spencer to our team. It was easy to get up and running, our employees quickly adapted to the system and it has improved our turn-around times and accuracy tremendously." - JoeExecutive, President and CEO of a really big company

Spencer's Briefcase

For added functionality, check out these options from Joe's portfolio:

Analytical Accounting Integration by Joe – get more intelligence from expense reports by driving details to analytical codes.

Active Directory Manager by Joe – enables active directory integration for Penny and Spencer, reducing the number of passwords end-users need to remember.
